

## Comfort

A nautical leather bucket seat offers optimal comfort while maintaining control. Premium pads provide non-slip surfaces.

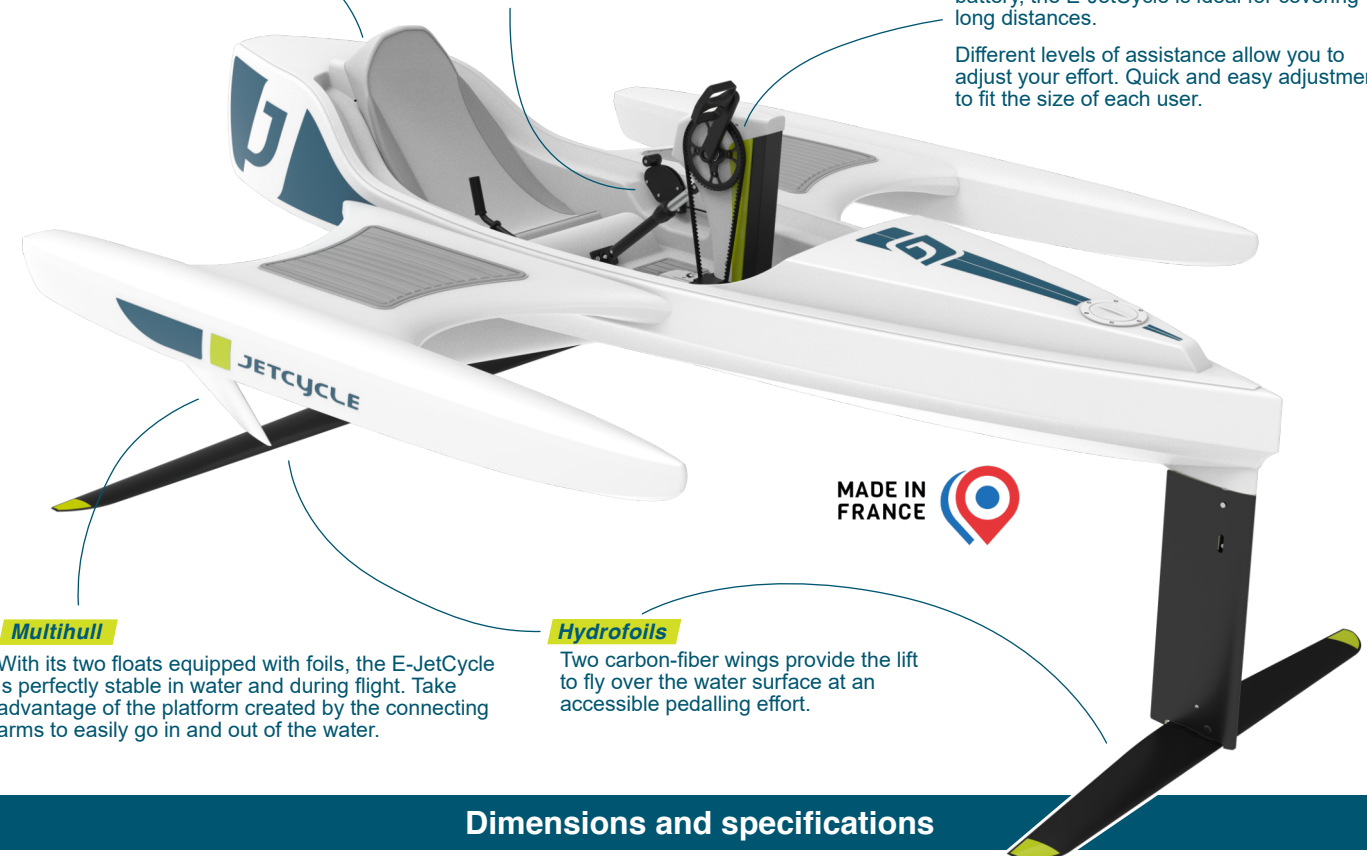

## Controls

Control the craft with a steering handle and an incidence lever controlling the flight altitude.

## Electric crankset

Equipped with an electric motor and a long-life battery, the E-JetCycle is ideal for covering long distances.

Different levels of assistance allow you to adjust your effort. Quick and easy adjustment to fit the size of each user.

MADE IN FRANCE

## Multihull

With its two floats equipped with foils, the E-JetCycle is perfectly stable in water and during flight. Take advantage of the platform created by the connecting arms to easily go in and out of the water.

## Hydrofoils

Two carbon-fiber wings provide the lift to fly over the water surface at an accessible pedalling effort.

## Dimensions and specifications

Lenght	3.40 m
Width	2.30 m
Height	1.20 m
Front Hydrofoil	1.40 m // 1 700 cm <sup>2</sup>
Rear Hydrofoil	2.30 m // 3 330 cm <sup>2</sup>
Draft	75 cm
Total mass	55 kg
Take-off speed	5 kts // 10 km/h
Cruising speed	8 kts // 15 km/h
Top speed	10 kts // 20 km/h
Turning radius	2 m
Electric motor power	200 W
Battery life	3 hours
Regulation	French Division 245
